

# safetrack<sup>®</sup> LM

**Project:** ALDERMANBURY SQUARE, LONDON  
**Client:** CITY OF LONDON CORPORATION  
**Main Contractor:** FM CONWAY

products in action

Aldermanbury Square, located in the City of London and housing such prestigious buildings as 'The Guildhall' and the award winning '5 Aldermanbury Square' designed by Eric Parry, has been transformed into an area offering both modern office workspace and a tranquil setting in which to relax and enjoy.

In keeping with the high quality aesthetics of the square granite was specified for the surfacing. However this surface poses adhesion and wear problems for traditional thermoplastic road markings. Consequently the City of London Corporation opted for the MMA based Safetrack LM system, which achieves high adhesion values to granite and other porous substrates, extending its life and ensuring that repetitive reinstatement is not required.

Prior to application the contractor, FM Conway, removed the existing markings, which had worn badly due partly to their poor adhesion to the hard granite surface. Adhesion tests were then conducted to confirm the strong adhesion that the Safetrack LM system would achieve to the substrate, with the failure being in the granite itself.

Safetrack LM Durable, a cold applied product, pigmented primrose yellow was then laid in two lines to form the new "No Parking" indicators in the Square.

The rapid cure of Safetrack LM Durable meant that within an hour of the 300 linear metre application the road was re-opened for full pedestrian access and traffic use and the Square was left with new, aesthetically pleasing and long lasting road markings.
